

## Up-Link<sup>®</sup>

Now available as LapCabby Up-Link<sup>®</sup> 16V / 20V  
and LapCabby Up-Link<sup>®</sup> 16H

- The LapCabby Up-Link<sup>®</sup> range comes complete with gigabit switch and WiFi access point.

- WiFi Access Point (D-Link DAP-2553) – allows the unit to be plugged into the school LAN providing a wireless access point for the laptops to connect to whilst being used in the classroom.

[www.lapCabby.com](http://www.lapCabby.com)

- Gigabit Network Switch (D-Link DGS-1210-24) and concealed Cat5e cabling – laptops can remain connected to the LAN even while charging allowing laptops to be updated overnight.

- All Internal wiring is concealed for a smart finish.

- Both networking units are kept in the ventilated moulding secured to the top of the unit. This allows easy access if required, but prevents the units from being tampered with.
