

The Rydal Academy revamps their learning space with sleek and stylish device management solutions from LapCabby

Primary School

Laptops

Safe

The Rydal Academy recently made substantial investments in classroom technology to ensure their students have access to the tools they need to get the most from their education.

With 190 Laptops across multiple classrooms, Rydal sought to protect their investment with a reliable store and charge solution. Previously, the Academy had just 40 devices in a mobile cart, moving between classrooms as and when required. This left classes short of equipment and caused laptops to become broken and damaged soon after they were purchased.

Keen to increase the longevity of their investment, David Wilson, IT Technician, found the most suitable solution was the Lyte Single Door unit from LapCabby. Its robust design, small footprint and high-quality finish made Lyte the perfect solution for the classroom environment.

Ensuring laptops are stored safely and securely not only increases their lifespan, but improves health and safety across the school, reduces risk of damaged or missing charging cables (all cables are hidden behind a secure panel) and keeps the classroom neat and tidy.

Lyte 16SD

“Education technology is becoming a fundamental part of learning, it’s crucial that all students have access to the most effective and appropriate tools to enable them to achieve best results. Lyte from LapCabby has been the perfect way for us to protect our investment across the school. Their customer service has been faultless and the quality of the product demonstrates tight quality control and extensive research prior to development.”
