Budget friendly

Protected
Covered with a lifetime warranty

Charges all devices simultaneously. **Power 7 Management System** manages the power consumption to ensure power surges do not occur and all devices charge efficiently. Power 7 features a sophisticated timer allowing three different charge schedules a day, 7-days a week. Power strips turn on one at a time, 1.5 seconds apart to provide inrush surge protection.

Secure back compartment houses excess cables and power strips and has individual cable pockets for each device to store AC adaptors.

Cable clip portholes that feed cables from the back compartment to the front of the unit, preventing cables from being removed from the front.

IEC power cable plugs into the mains and are designed to snap out if pulled away from the wall, preventing damage to the unit or any nasty trips.

UniCabby power compartment

LapCabby Vertical power compartment

Ergonomic ABS handles make UniCabby and LapCabby easy to maneuver.

Dual point locking system with lock and key located on top of the unit to avoid key breakages. The double sided key has two sets of teeth making the locking system more durable, impossible to pick and substantially increases security.

Inset colored door handles prevent protruding parts.

Rounded corner extrusions and rubber bumpers protect the walls and devices when in transit.

Fitted with 4 x 3" swivel, non-marking hospital grade rubber wheels (2 locking) making it easy to move.

All units are tested to the highest level worldwide
