WELCOME TO LAPCABBY

LapCabby was founded by Monarch Education Furniture in the early 2000s, after spotting a gap in the technology market.

20 years later and LapCabby is a globally renowned company supplying top-quality charging storage solutions to the education sector, healthcare sector and many other industries from Government organisations to retail outlets, in over 50 countries worldwide.

As one of the original manufacturers of technology charging solutions, LapCabby has changed the way professional environments ensure their devices are fully charged and ready to integrate into their daily work.

LapCabby intricately designed units are manufactured to the highest degree enabling it to offer a popular lifetime guarantee with every product sold.

WHY CHOOSE US?

Crafted with care

Every component used to build our products is designed and manufactured in house. We take control of the entire process to ensure only premium quality across our entire range.

Lifetime Warranty

We're so confident in what we do, that we offer a lifetime warranty and five-year electrical cover on every single product. You won't find this kind of cover anywhere else.

Safety Assured

Our units are put through extraneous third-party safety testing to ensure optimal mechanical strength, electrical reliability, heat/fire safety and are topple tested for stability.

Designs that work

Sliding shelves, retractable doors and wide access make it easier to get to your devices. Our specially designed cable management means you don't get any dangerous cable spaghetti. Rounded corners and shock absorbing bumpers keep walls and your teams safe. You name it, we've got it!

Here to help

We pride ourselves on delivering exceptional customer service and support. Our expert team are always on hand to ensure we can assist you whenever you might need us, with whatever it may be!

Intelligent charge

Our unique power7 management and intelligent charging capabilities mean that you'll use power only when you need to so devices will never be overcharged.

CUSTOM MADE PROJECTS

Custom made projects to meet your needs
with bespoke Design & British manufacturing

If you have a project or design that you would love to bring to fruition, LapCabby's dedicated design and manufacture teams can help make it a reality.

Our talented workforce can work along side yours to ensure your organisation gets exactly what they want.

With over 30 years of experience, a dedicated design, production and logistics team and lifetime warranty with every LapCabby product, you'll have complete peace of mind while you let us handle every aspect of your project.

LAPCABBY.COM

HOW DOES IT WORK?

1. Brief

Step one in launching your custom project is an in-depth consultation with the LapCabby Team. We explore your plans in detail, discuss timings and budget, and create a research & development brief.

2. Design

Step two; we move onto the design, prototyping and testing of your ideal build, translating your plans into reality, helping you really get a sense of how the finished project will look and feel.

3. Build

Step three; full assembly can commence, building your desired number of units to the exacting specifics agreed. To maintain the level of detail and quality that we're known for, we manufacture as much of the units as possible at our dedicated factory in Nottingham.

4. Deliver

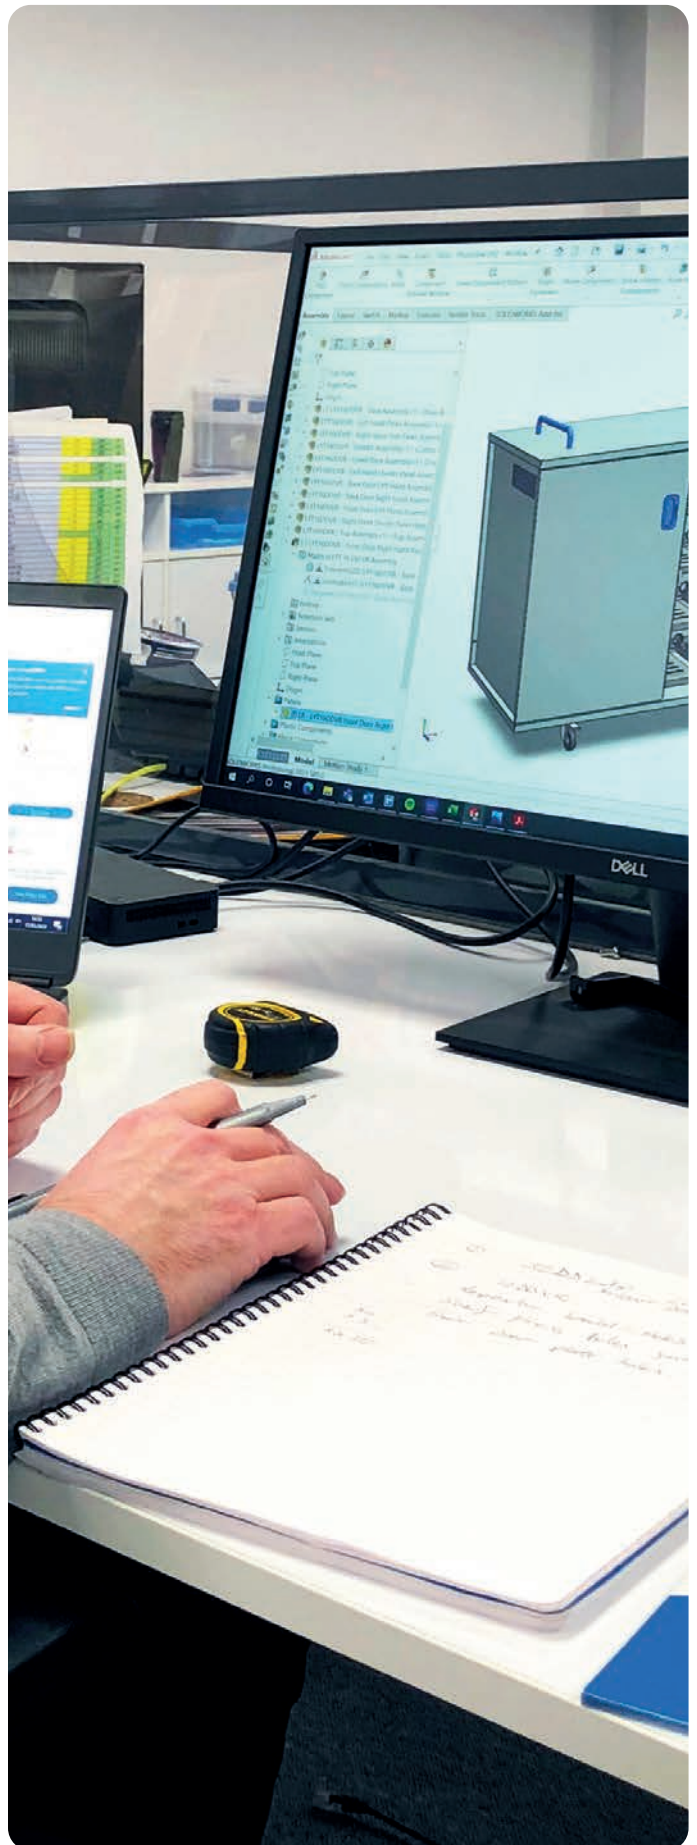

Final step; every single one of our products is delivered fully assembled, so all you need to do is lift off the packaging and plug it in – then you're ready to go!

Fixed individual shelves keep devices in place.

Built-in heat sensor will shut off power if a device overheats.

5 point cable management system to store cable.

Separate power compartment opened with a concealed handle.

Fully welded steel frame with weldmesh base for constant air flow.

Large L-Shape doors for easy access.

Cable clip portholes feed cables.

Well placed vents allow constant air circulation.

Power 7 Management System manages the power consumption.

Individual pockets for AC adaptors with cable clips to secure cables in place.

Device adaptors plug into 2 x 10-way power strips.

IEC socket with 1.8m designed to snap out if pulled away.

- **Charges 20 Devices** up to up to 14" screen size or **10 devices** up to 17" – Chromebooks, laptops and tablets including protective cases
- **Sliding Shelves with Protective Storage Boxes** store devices vertically with specially moulded cable
- **Fast and Flexible** with simultaneous charging and programmable timer
- **Maximum Security & Safety** with dual point locking system and separate lockable power compartment
- **Easy to Move** ergonomic top handles, rounded corner bumpers and multi directional non-marking wheels
- **Silent Charging** with unique ventilation system and built-in heat sensor
- **Support for Life** with Lifetime Warranty (5 years electrical), ships fully assembled

Technical specifications

Unit dimensions

W620 x D705 x H1105 mm 24.4" x 27.8" x 43.5"

Device compartment size

W360 x D450 x T30 mm 14.2"x 17.7" x 2.0"

AC pocket size

W210 x D90 x H210 mm 8.3" x 3.5" x 8.3"

Available with UK, North American, European and Australian power. Add country code (**/EUR**, **/USA**, **/AUS**) after part code number.

/EUR European Power

/USA North American Power

/AUS Australian Power

Devices stored vertically in protective storage on sliding shelves.

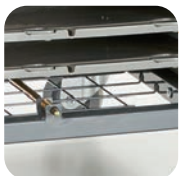

Built-in heat sensor will shut off power if a device overheats.

Cleverly integrated twisting cable clips to ensure cables stay in place.

Separate power compartment opened with a concealed handle.

Fully welded steel frame with weldmesh base for constant air flow.

Large L-Shape doors for easy access.

Cable clip portholes feed cables.

Well placed vents allow constant air circulation.

AC adaptors are stored separately in baskets.

Power 7 Management System manages the power consumption.

IEC socket with 1.8m designed to snap out if pulled away.

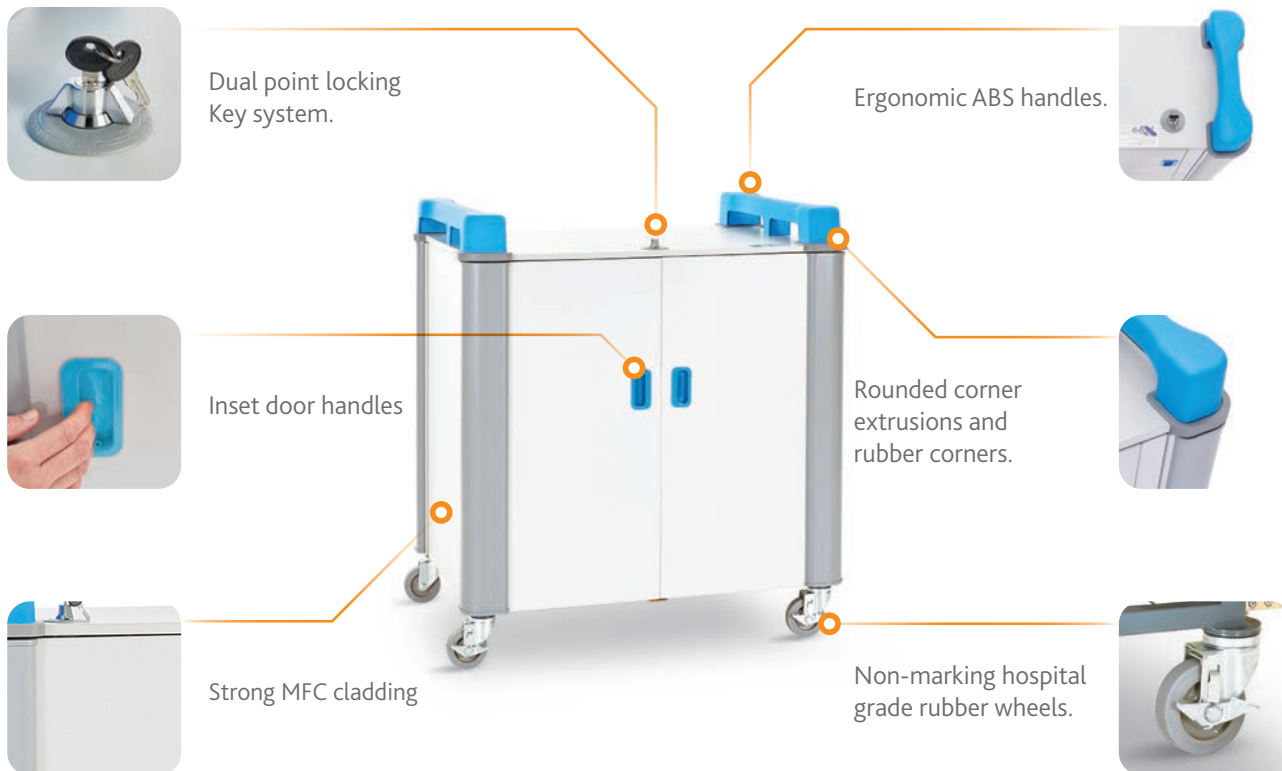

Device adaptors plug into 4 x 5-way power strips.

W420 x D390 x H1800 mm 16.5" x 15.5" x 71"

Device compartment size

W280 x D300 x T83 mm 11" x 11.5" x 3.2"

Available with UK, North American, European and Australian power. Add country code (**/EUR**, **/USA**, **/AUS**) after part code number.

/EUR European Power

/USA North American Power

/AUS Australian Power

Wall bracket for extra security.

Individual key lock secures each compartment.

Simultaneous charging of all 15 devices to ensure devices are fully charged as fast as possible.

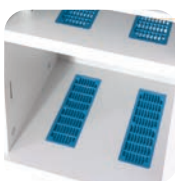

Non-marking feet.

IEC power cable into the mains.

12mm grey MDF fixed shelves.

Well placed air vents to the rear and base.

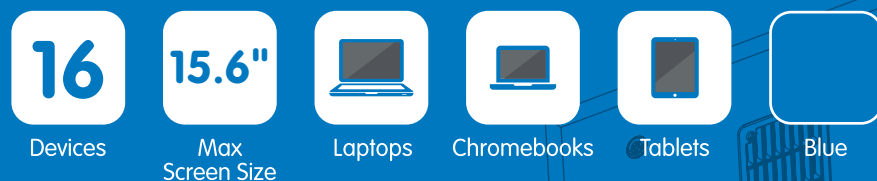

1 x 15 way powerstrips

LYTE 16 MULTI DOOR

Part code number: LYT16MDBL

- **Charges 16 Devices** up to 15.6" screen size – Chromebooks, laptops and tablets (including protective cases), POS devices, tooling and other chargeable equipment
- **Individual Charging Compartments** include access to a power socket and secured with a reprogrammable combination lock
- **Multi-Layered Security System** for users, admins and master code holders
- **Fast Charging & Soft-Start Feature** charges devices simultaneously with no possibility of a circuit overload
- **Built to Last** with high density materials, components and construction processes to withstand the busiest environments such as education, healthcare, retail, industrial and commercial
- **Silent Charging** with unique ventilation system and no noisy fan
- **Support for Life** with Lifetime Warranty (5 years electrical), ships fully assembled

Technical specifications

Unit dimensions - EU

W540 x D525 x H1100 mm 21.3" x 20.7" x 43.3"

Device compartment size - EU

W400 x D420 x T50 mm 15.7" x 16.5" x 2"

Available with North American, European and Australian power. Add country code (**/EUR**, **/USA**, **/AUS**) after part code number.

/EUR European Power

/USA North American Power

/AUS Australian Power

Individual keypad lock with 6 digit code.

Strong MFC cladding

Well placed air vents to the rear.

Non marking feet.

IEC power cable into the mains.

12mm grey MDF fixed shelves.

Well placed air vents to the base.

Power socket located within each compartment.

UPGRADES & EXTRAS

LapCabby Connect

Better connectivity with LapCabby Connect

The LapCabby Connect upgrade gives each laptop or netbook/Chromebook quick and easy WiFi access.

The integrated access point is kept secure and well-ventilated on the inside of the laptop trolley unit and can be accessed easily whenever you need it. LapCabby Connect laptop trolleys can store and charge between 10 and 32 laptops, netbooks or Chromebooks.

LapCabby Ready 4 Connect

This option gives the same benefits as the LapCabby Connect, but allows you to use your own hardware.

LapCabby UpLink

Outstanding WiFi access with LapCabby Up-Link

Our LapCabby Up-Link upgrade comes with a WiFi access point that allows the computer trolley to be plugged into the school LAN, providing a wireless access point for the classroom.

The Up-Link laptop trolleys also use a Gigabit Network Switch. Allowing laptops to stay connected to the LAN even when they're charging, meaning they can be updated remotely overnight.

Clever internal wiring gives a neat and tidy finish with ventilated secure moulding, protecting against tampering while still providing easy access.

LapCabby Ready 4 UpLink

This option provides the same benefits as the LapCabby Up-Link, but allows you to use your own hardware
