# 8 BAY MOBILE PHONE LOCKER

Smartphones

Introducing our 8-bay mobile phone locker, designed to deliver unparalleled charging solutions with the utmost security. Crafted with excellence, this locker is equipped with top-tier power strips, offering versatile power options including 240 volts, USB Type-A, and USB Type-C, catering to a wide range of mobile devices.

Engineered for convenience and flexibility, this compact charging locker can be seamlessly integrated into any space, with options for wall or floor mounting when securely fixed. It's an ideal solution for fostering focus and productivity in environments such as universities, schools, warehouses, and offices by storing and charging mobile phones safely, ensuring they're ready for the journey home while keeping workspaces clutter-free.

Each locker is carefully designed with ventilation to prevent overheating, ensuring the safety and longevity of devices. For added security and peace of mind, the locker must be anchored to a wall, providing stability and deterring theft.

Customize your locker to meet your specific needs with three power configurations: AC, USB Type-A and USB Type-C, or a combination of AC with USB Type-A and USB Type-C. Choose from four robust locking mechanisms: Cam lock, Hasp lock, Mechanical digit lock, and Digital digit lock, to ensure the safety of devices stored within.

Elevate your space with our 8-rack mobile phone locker, the perfect blend of functionality, security, and sleek design, tailored to keep devices charged, secure, and out of sight, enhancing focus and productivity in any setting.

# 10 BAY LAPTOP LOCKER

Laptops

Chromebooks

Tablets

Discover the ultimate solution in device security and charging with our 10-bay laptop locker. This locker is equipped with superior quality power strips that support 240 volts, USB Type-A, and USB Type-C, ensuring a wide range of laptops can be charged efficiently and safely.

Our innovative locker design includes individually locked compartments as well as single-door quick access options, providing versatile and secure storage solutions that cater to the unique needs of universities, schools, and offices. This flexibility ensures that each laptop is not only charged but also stored securely, supporting the integrity and privacy of each user.

Engineered with safety in mind, each locker unit features built-in ventilation to prevent the overheating of devices, safeguarding both the electronics and the users. For enhanced security and stability, we recommend securing the locker to a wall, providing an added layer of protection against tipping or unauthorized removal.

Customization is key with our locker, offering three power configurations: AC, USB Type-A and USB Type-C, or a combination of AC with USB Type-A and USB Type-C. Additionally, choose from four robust locking mechanisms: Cam lock, Hasp lock, Mechanical digit lock, and Digital digit lock, allowing you to tailor the security features to your specific needs.

Elevate the efficiency and security of your space with our 10-bay laptop locker, designed to seamlessly integrate into any educational or professional environment, ensuring that devices are charged, secured, and ready for use whenever needed.

# 15 BAY LAPTOP LOCKER

Laptops

Chromebooks

Tablets

Introducing our 15-bay laptop locker, the ultimate solution for secure storage and efficient charging. This locker is outfitted with premium power strips accommodating 240 volts, USB Type-A, and USB Type-C connections, designed to cater to a broad spectrum of laptop charging requirements.

Our locker is thoughtfully designed with individually locked compartments alongside single-door quick access options, providing optimal security and convenience for high-traffic environments like universities, schools, and offices. This design ensures that each laptop is stored securely and charged, ready for use, thereby enhancing productivity and device management.

Constructed with user safety in mind, each compartment is ventilated to prevent overheating, ensuring the longevity of the devices and the safety of the users. To guarantee the locker's security and prevent tipping, we advise securing it firmly to a wall.

Tailor the locker to meet your specific requirements with our versatile power options: AC, USB Type-A and USB Type-C, or a combination of AC with USB Type-A and USB Type-C. Additionally, select from four durable locking mechanisms: Cam lock, Hasp lock, Mechanical digit lock, and Digital digit lock, providing customizable security to suit your needs.

Upgrade your facility with our 15-bay laptop locker, designed to integrate seamlessly into any setting, offering a practical, secure, and stylish solution for charging and storing laptops, thereby optimizing space and enhancing organizational efficiency.
